Buford, GA | (470)-303-6515 | ethansamuel6939@gmail.com

EDUCATION

Georgia Gwinnett College - Lawrenceville, GA

January 2025 – January 2029

BS Information Tech - Systems and Cybersecurity Program

GPA: 3.6

Relevant Coursework: Information Security, Algorithms, Information Systems, Operating Systems, Intro to Databases, Networks, OOP and Data Structure

PROFESSIONAL EXPERIENCE

Jens Wellness Health Clinic

May 2022 – August 2025

Help Desk Support

Dacula, GA

- Supported daily technology operations for a health clinic by troubleshooting 10+ devices and software systems, including computers, printers, internet connectivity, email, scheduling, billing, and telehealth platforms.
- Assisted with user account setup, password resets, MFA access, and login troubleshooting using Microsoft Active Directory, helping clinic staff maintain secure access to patient-related systems while reducing repeated access issues. Helped with the onboard/offboarding process for clinic staff.
- Created and maintained a basic IT asset inventory for 30+ clinic technology assets, including laptops, software accounts, user access levels, and device status to improve organization and security tracking.

GGC Wellness and Recreation Center

August 2026 – Present

Membership Services Student Assistant

Lawrenceville, GA

- Assisted 50–100+ students, faculty, and guests per shift with check-in/check-out, membership questions, facility access, and front-desk support.
- Used membership/check-in software to verify student eligibility, look up accounts, update basic information, and resolve common access issues in a fast-paced campus environment.
- Troubleshoot basic front-desk technology issues such as card-scan problems, account lookup errors, check-in delays, and system interruptions before escalating unresolved issues to supervisors.

MyFirstHack

May 2026 – Present

Online Cybersecurity Apprenticeship Program

Buford, GA

- Completed hands-on cybersecurity training focused on networking, Linux command-line fundamentals, security concepts, threat identification, and defensive security practices.
- Worked through real-world security tasks and lab-based assignments involving access control, system hardening, vulnerability awareness, incident response basics, and security documentation.
- Developed beginner-level experience with cybersecurity tools, security workflows, and analyst-style thinking through structured daily assignments and mentorship.

LEADERSHIP & INVOLVEMENT

Calvary Assembly Church of God

September 2018 – Present

Audio / Visual Installer

Sumner, Georgia

- Assisted with audio/visual technology setup for weekly church services and special events serving 100+ members, including sound systems for speakers, projectors, microphones, and display equipment.

- Helped install, connect, and test A/V equipment to support clear sound, video projection, worship services, announcements, and live event presentations.
- Troubleshoot basic technical issues involving speakers, cables, microphones, projectors, and display connections before and during services.
